ABRIL RODRÍGUEZ

SOFTWARE ENGINEER

Buenos Aires, Argentina · arodriguezfontana@gmail.com · linkedin.com/in/rodriguezfontana · github.com/arodriguezfontana

PROFESSIONAL SUMMARY

Advanced Computer Science undergraduate (UNQ) with a strong track record in Full Stack development. I specialize in building, maintaining, and optimizing scalable web applications using React, Python, and Java, while expanding into data science. Experienced in integrating Large Language Models (LLMs), designing persistence architectures (SQL and NoSQL), applying automated testing best practices, and implementing continuous deployments through CI/CD pipelines. Known for an analytical and proactive mindset, strong communication skills, collaborative teamwork in agile environments, and the strategic use of AI to accelerate the software development lifecycle and continuous learning.

WORK EXPERIENCE

Full Stack Engineer Altitud — Jun. 2025 – Present

- End-to-end development, maintenance, and optimization of full-stack applications for diverse industries (healthcare, e-commerce, services, among others), ensuring dynamic interfaces, high availability, and maximum performance.
- Design and integration of scalable REST APIs, microservices, and persistence layers across SQL and NoSQL databases following Clean Architecture principles.
- Construction of interactive, responsive, and accessible web and mobile interfaces with a strong focus on user experience (UX/UI).
- Active collaboration in multidisciplinary teams under Scrum methodology, CI/CD pipelines, version control using Git/GitHub, and proactive troubleshooting of production incidents.

Teaching Assistant · Universidad Nacional de Quilmes (UNQ) — Mar. 2025 – Present

Persistence Strategies:

- Delivered lectures and technical mentoring on REST API design, hybrid persistence architectures (SQL/NoSQL), and complex query optimization.

Object-Oriented Programming:

- Supervised lab sessions and resolved technical inquiries, guiding students through object-oriented design principles, modularity, and Test-Driven Development (TDD).

FEATURED PROJECTS

RestoIT · Intelligent Hospitality Platform
Technologies: Python, FastAPI, PostgreSQL, React

- Developed an end-to-end full-stack platform for restaurants and venues, unifying web orders and AI-powered conversational channels via real-time WhatsApp automation.
- Built a real-time administrative dashboard using React and Tailwind CSS, featuring virtual kitchen display systems (KDS) and predictive demand analytics.

Accidenta · Emergency & Safety Mobile Solution
Technologies: React Native, Python, FastAPI, PostgreSQL

- Engineered a mission-critical safety system featuring real-time geolocation tracking, instant SOS alerts, and emergency medical profile management.
- Implemented multimedia incident reporting, live map tracing, and an analytical dashboard tracking incident density across geographic zones.

Compra tu Hogar · Comprehensive Real Estate Web Platform
Tecnologías: React, Python, FastAPI, PostgreSQL

- Developed a full-stack real estate management and purchase tracking platform with multi-role user access, advanced property search filters, and a favorites system.
- Integrated user reviews, interactive analytical reporting, and a modular architecture backed by comprehensive automated testing.

EDUCACIÓN

Bachelor's Degree in Computer Science · Universidad Nacional de Quilmes — Mar. 2022 – Present
Associate Degree in Computer Programming · Universidad Nacional de Quilmes — Mar. 2022 – Dec. 2026
Specialization in Data Science · Educación IT — Jun. 2026 – Present

TECHNICAL SKILLS

Frontend:	React, Next.js, TypeScript, JavaScript, Tailwind CSS, Vite, HTML5, CSS3
Backend:	Python (FastAPI), Java (Spring Boot), Node.js, Express, NestJS
Persistence:	PostgreSQL, MongoDB, Elasticsearch, Neo4j, Redis
Tools:	Docker, Git, CI/CD, Testing (Pytest, JUnit, Jest), Scrum, LLMs, Claude Code, Gemini, Antigravity, Prompt Engineering, SDD
Data & IA:	SQL, Power BI, Google Sheets, Power BI, Python (Numpy, Pandas, Matplotlib)

LANGUAGES & REFERENCES

English: B2 (Upper-Intermediate)
Spanish: Native
