

ABRIL RODRÍGUEZ

FULL STACK DEVELOPER

Buenos Aires, Argentina • arodriguezfontana@gmail.com • linkedin.com/in/rodriguezfontana • github.com/arodriguezfontana

PROFESSIONAL SUMMARY

Advanced Computer Science student at UNQ with a solid track record in Full Stack Development. I specialize in building, maintaining, and optimizing scalable web applications using React, Python, and Java, while actively exploring the field of Data Science. I have hands-on experience integrating Large Language Models (LLMs), designing SQL and NoSQL persistence architectures, implementing automated testing best practices, and managing continuous deployment pipelines (CI/CD). I stand out for my analytical and proactive mindset, communication skills, collaborative teamwork in agile environments, and the strategic use of AI to enhance the software engineering lifecycle and continuous learning.

WORK EXPERIENCE

Full Stack Developer • Altitud

Jan. 2025 – Present

- End-to-end development, optimization, and maintenance of full-stack web applications for clients across healthcare, e-commerce, services, etc., ensuring responsive UI, high availability, and maximum performance.
- Architected and integrated scalable REST APIs, microservices, and SQL/NoSQL persistence under Clean Architecture principles.
- Engineered responsive, accessible, and dynamic web and mobile interfaces with a rigorous focus on user experience (UX/UI).
- Collaborated actively within agile teams (Scrum), maintained CI/CD automated deployment pipelines, version control with Git/GitHub, and provided proactive incident resolution in production environments.

Teaching Assistant • Universidad Nacional de Quilmes (UNQ)

Mar. 2025 – Present

Persistence Strategies:

- Delivered lectures and technical mentorship to undergraduate students on REST API design, hybrid persistence architectures (SQL/NoSQL), and complex query optimization.

Object-Oriented Programming:

- Supervised practical lab sessions and mentored students on object-oriented programming principles, modular architectural patterns, and Test-Driven Development (TDD).

FEATURED PROJECTS

RestoIT • Intelligent Restaurant Management Platform

Technologies: Python, FastAPI, PostgreSQL, React

- Engineered a full-stack solution for hospitality management unifying web ordering with AI-automated conversational channels over WhatsApp in real time.
- Implemented a real-time administrative dashboard in React and Tailwind CSS featuring sectorized kitchen ticket routing and predictive demand analytics.

Accidenta • Mobile Emergency & Safety Solution

Technologies: React Native, Python, FastAPI, PostgreSQL

- Developed a mission-critical safety application featuring real-time geolocation, instant emergency alert broadcasts, and secure emergency medical profile management.
- Engineered multimedia incident reporting with interactive live mapping and a localized statistical dashboard tracking accident trends.

Compra tu Hogar • Comprehensive Real Estate Web Platform

Technologies: React, Python, FastAPI, PostgreSQL

- Developed a full-stack property search and transaction management web platform featuring multi-role user access, advanced filtering, and favorites bookmarking.
- Implemented user reviews, interactive analytical reports, and a modular architecture with comprehensive testing.

EDUCATION

B.S. in Computer Science (Licenciatura en Informática) • Universidad Nacional de Quilmes

Mar. 2022 – Present

Associate Degree in Computer Programming • Universidad Nacional de Quilmes

Mar. 2022 – Dec. 2026

Specialization in Data Science • Educación IT

Jun. 2026 – Present

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Vite, HTML5, CSS3.

Backend: Python (FastAPI), Java (Spring Boot), Node.js, Express, NestJS.

Persistence: PostgreSQL, MongoDB, Elasticsearch, Neo4j, Redis.

Tools: Docker, Git, CI/CD, Testing (Pytest, JUnit, Jest), Scrum, LLMs.

LANGUAGES & REFERENCES

English: B2 Level (Upper-Intermediate) **Spanish:** Native
